AAI-500 – Team Project Status Update Form

Fill out this form and submit it by the end of Module 4 in Blackboard.

Team Number: _____2_____

Team Leader/Representative: Nathan Sabbara

Full Names of Team Members:

1. Nathan Sabbara
2. Anthony Feaster II

Title of Your Project: Predicting NFL Third Down Conversions

Short Description of Your Project and Objectives: Using play-by-play data from the 2023-2026 seasons, this project will examine factors that influence successful third down conversions. We will analyze variables such as yards to go, quarter, field position, team statistics (such as offensive rating, opponent defensive rating, and in game yardage) and score differential. Our objectives for this project are to identify relationships between game situations and conversion success, compare conversion patterns across seasons, and develop a model to estimate the probability of a successful third down conversion.

Name of Your Selected Dataset: NFLverse Play-By-Play Data, 2023-2026

Description of Your Selected Dataset (data source, number of variables, size of dataset, etc.):

The dataset for this project was obtained from the NFLverse play-by-play data repository. We are using data from the 2023-2026 seasons and that combined dataset contains 155,882 plays and 372 variables. After filtering for third down plays, the dataset contains 25,387 plays and 372 variables. Although the 2026 season is still ongoing, we are including its data because it may represent current third down strategies in the NFL.

Are you using and practicing GitHub as a code hosting platform for version control and collaboration? If yes, provide the link here: https://github.com/anthonyfeaster/USD-AAI-500-Final-Project

How many times have your members met in the last two weeks? Twice

What was the agreed upon method of communication? Are you using any teamwork project management software, such as Trello or Asana? We communicate via email, slack, zoom, and text messages. We are not using any team project management software.

Comments/ Roadblocks: N/A
